

A Hospitality Training Hotel on Splantzia Platz

Master Design Project and Excursion to Chania, Crete

SSE 2018

Excursion und Workshop

21.04.2018 to 28.04.2018

EP BiB Module 22423 10 CP

Module 11749/11751 each 12 CP

Known today as one of the most beautiful cities in Greece, Chania was founded in antiquity and formed by various and diverse cultures over the course of history. Successive Byzantine, Venetian and Turkish conquests have left a multilayered and complex urban architecture, unique in its interplay of cultural influences. We have the unusual opportunity to propose and develop a design project which will address future social needs, while at the same time repairing and restructuring the urban fabric around Splantzia Square, an historic central gathering place. The ruins of the Church of Agios Nikolaos are part of the area under consideration.

Maximum 24 Students, ordered by signing the participants list at the BiB office. Tip: flights to Athens with Ryanair, Easyjet und Aegean Air, connecting to Chania are inexpensive. Additional details at the BiB office. Try www.skyscanner.de
