Where will the program take place?

Main Host city: Ismailia, Egypt

Other cities that will be visited: Cairo, Giza, Alexandria, Ain Sokhna, Port Said, Fayoum, Dahab, and Sharm El Sheikh

What is it all about?

40 accredited hours scientific program where participants can choose to attend one of our accredited programs:

Each scientific program includes Lectures, group discussions, and hands-on clinical experience.

1- Emergency Program

You will have lectures on the latest and most relevant topics in Emergency medicine, as well as doing hands-on clinical rounds. You will also have the chance to join surgeries and attend emergency-related workshops.

2- Tropical Medicine and Infectious Diseases program

You will have lectures on the most common tropical and infectious diseases in Egypt. You will also attend hands-on clinical rounds and attend the endoscopy unit as well as the surgery room.

3- Dental/Maxillofacial Program

You will have lectures, attend surgeries for maxillofacial fractures, and visit dentistry clinics to learn about endodontics, dental extractions, and other common topics.

4- Pharmaceutical Program

You will have lectures on the most common clinical pharmacy topics, attend laboratory sessions, and pay visits to local pharmacies to learn about the system in Egypt.

5- Diagnostic Radiology Program

You will have the chance to learn about radiography, Ultrasonography, CT, and MRI scans at our Radiology department.

6- Physiotherapy Program

You will attend lectures on applied anatomy, biomechanics, and physiology and learn about physiotherapy clinical skills in clinical rotations.

7- Perioperative Nursing Program

You will learn about the different roles of a perioperative nurse including holding bay, circulating, anesthetic, instrument or scrub nurse, and recovery room. As well as having real clinical practice.

8) Plastic & Reconstructive Surgery Program:

You will get exposed to severe trauma patients and the latest protocols of the reconstruction ladder. You'll attend lectures, clinical rotations, operations, as well as introduction to microsurgery. You'll also get introduced to most of the aesthetic surgeries.

9) Architectural Engineering Program:

You will have the chance to get introduced to ancient Egyptian architecture, Islamic, and Coptic architecture. You will attend lectures in basics of Arabic architecture as well as do hands-on projects together with your colleagues from all around the globe.

Students will have the privilege to perform a lot of hands-on examinations, and deal with a lot of patients which will enhance their clinical skills.
