THOUGHT, INTEGRAL INFRASTRUCTURE AND URBAN PLANNED SOLUTIONS

ICAUS 2025-2026 ISKENDERUN NEW RESILIENT PROSEISMIC CITY DESIGN

The goal of this contest is to create an innovative and conceptual **seismic-resilient solution** for rebuilding a devastated city, free from professional or economic constraints. Students are encouraged to design a **Pro-Seismic-Resilient city** that harmonizes with its geography, embraces seismic and tsunami challenges, and works with the natural movements of the land rather than against them.
