

Design a Real Home for a Real Community.

From temporary shelter to permanent homes: a free online design challenge for students, with international teams and global experts.

Nov 21, 28 & Dec 5, 12 | 09:30 – 13:30 GMT | 4 Saturday sessions (16 hours)

Research the context.

Find out which hazards occur and what they mean for homes.

Understand local needs.

Discover what communities need before and after a disaster.

Use local resources.

Explore which building traditions and natural materials exist locally.

Present your concept.

Turn your findings into a realistic design brief for safe housing.

Open to students of Architecture, Design, Engineering and Environmental Sciences.
